ABSTRACT

A clear and well-documented \LaTeX [1] document is presented as an article formatted for publication by ACM in a conference proceedings or journal publication. Based on the “acmart” document class, this article presents and explains many of the common variations, as well as many of the formatting elements an author may use in the preparation of the documentation of their work.

1 INTRODUCTION

I had this initial idea of being able to write Markdown documents. A very lightweight markup for plain text documents would make it easier and less resource intensive to write. Furthermore, I do take my notes in this style of writing.

A first research brought me to a blog post [2] outlining a simple setup to produce shareable versions of a note as an article in PDF, HTML, and DOCX.
